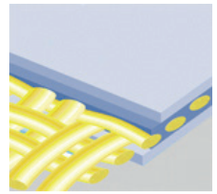
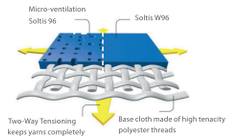
FABRIC



SICEN

PVC-based blackout fabric of 850g / sqm is used as a ceiling cover in Loca Motor Pergola System. The fabric, having a tensile strength of 2500 N / 50mm, provides thermal insulation by blocking 100% the sun thanks to its special three-tier structure

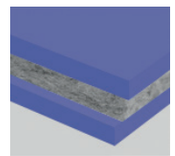
FERRARI



Soltis W96: Soltis W96, which is a roof covering series, is cutting the sunlight by 96% and keeps your interior locations cool, and in the meantime it will also make you benefit from the light of day thanks to its waterproof perforated structure.

Soltis 92: Soltis 92 series allows you a shading without blocking your view thanks to its micro-perforated structure, and it will ensure your location stay cool by absorbing the 97% of the sunrays.

SATTLER
thinking highTEX

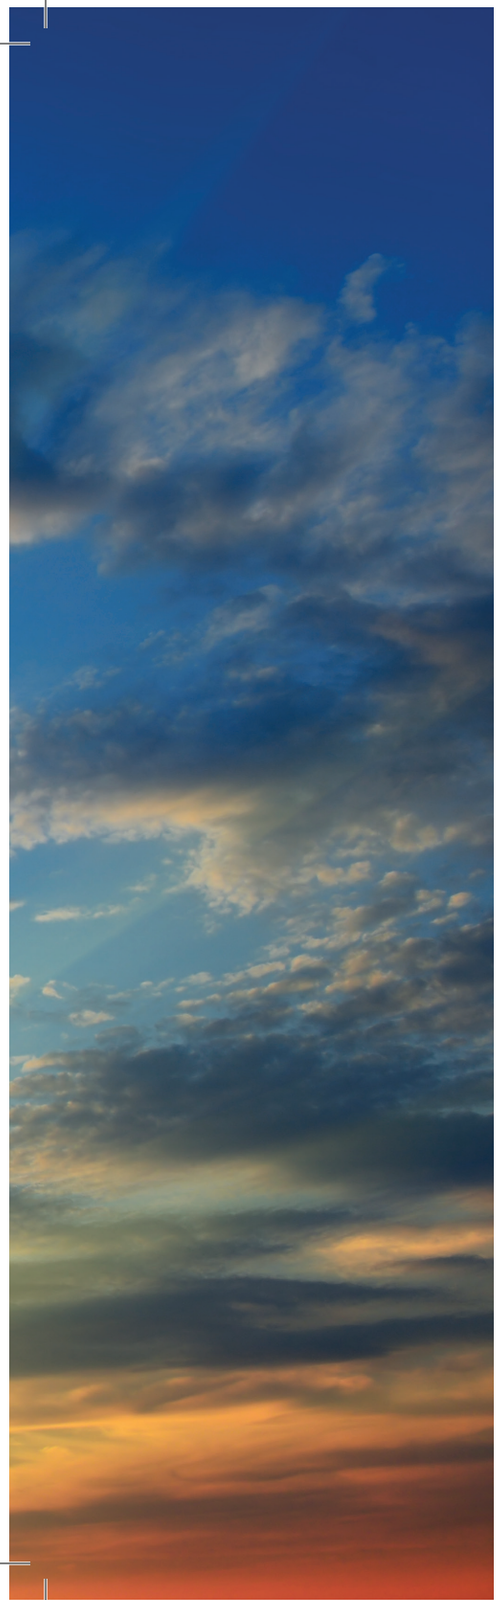


Izo –Tech: Izo – Tech, which is beyond the familiar ceiling coatings with its thickness of 3,2 mm, provides high thermal and sound insulation during four seasons within the moving ceiling covering.

DICKSON COATINGS

sunbrella

Acrylic Fabric: The outdoor acrylic fabrics used in our byproducts, provide partial shading by making advantage of the daylight.



LIGHTING SYSTEMS

Palmiye “L” Serie Motor Pergola Systems provides solution in your locations with the LED luminaries, which it offers optionally. The remote control dimmer system completes your comfort.

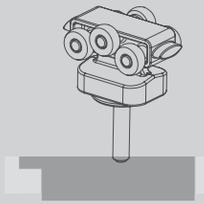
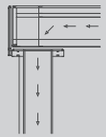
SEALING DETAIL

A special rubber seal that is attached to the rail profile, preventing against rainwater entering the product.



6 WHEELED CAR

This innovative 6 wheeled car silently, swiftly and in a well balanced manner carries the canvas up and down the rail.

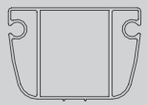


HIDDEN WATER DRAINAGE

All rainwater is collected by the gutter and guided out by a drainpipe hidden within the front pillar.

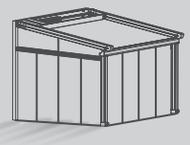
INTEGRATED ASSEMBLY DETAILS

Integrated within the profiles are assembly details, that give the product an extra touch of design and simplifies each installation.



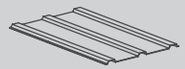
LOCOMOTIVE PROFILE

The locomotive fabric profile is strengthened by its inner reinforcements.



GLASS SYSTEMS

Different enclosing solutions can be applied directly to the profiles.

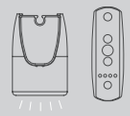


ROOFING

The Palmiye “L” Serie Roofing System is easy to install due to its innovative modular system.

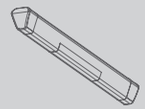
SIDE BEAM

A side beam can be easily installed or removed by the integrated assembly system.



LED SPOT LIGHTING

Control our LED spot lights directly from the remote control or dimmer system.

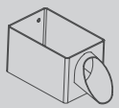


HIDDEN LED

Control our LED spot lights directly from the remote control or dimmer system.

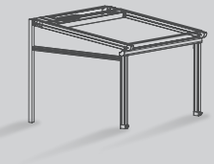
RAIL PROFILE

The Rail Profile is designe with special engineered form of construction.



STAINLESS FOOT

The stainless foot with its hidden installation details, discharges water coming from the carrier column.



RAIN & WIND TIGHT

The product is sealed against rain & wind from every side and direction.

DECORATIVE CEILING COVER

With a separate wavy layer of fabric a warm and cosy atmosphere can be created under the pergola.

3-LAYERED CEILING COVER

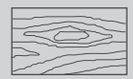
The ceiling cover is a 3-layered blackout PVC membrane that blocks 100% of all UV rays.

PALMIYE GUARANTEE

All our products have up to 5 years guarantee.

FAVORITE SETTING

In our standard motor system, one can save his favorite setting of the canvas or Palmiye “L” Serie Store with just pressing one button.



WOOD LOOK

The aluminum construction can be coated with a special Wood-Look transfer print.
