PALMIYE GLASS SYSTEMS

PRICE LIST INSTRUCTIONS

PRICE LIST

This price list may be modified by Palmiye Glass Systems at any time with in a 30 days notice.

PRICES

Prices are in Euro (€) and VAT is excluded.

PACKAGING & PALLETIZING

For all glass orders an amount of €200.- will be charged for Packaging & Palletizing per 50m².
In each additional 50m² an other pallet has to be made.

DELIVERY

Ex-Works factory.

DOUBLE GLASS FOLDING SYSTEM

GLASS SYSTEMS ► FOLDING GLASS SYSTEMS

This protective and classy concept has been developed in order to provide maximum comfort to any living space.

With perfect water and heat insulation as well as being completely airtight it integrates indoor and outdoor living.

Each panel is enclosed with an aluminium frame and in turn connected to each other

with strong hinges. Small wheels along the top and bottom of the frame enables the panel to open and close in the accordion folding style.

The strength of this system enables it to carry heavy panels and the extra rubber surround makes the system completely air tight and waterproof.

STANDARD CONFIGURATIONS

DIMENSIONS

Max Height	260 cm
Max Width	600 cm
Max Wing Width	100 cm
Min Wing Width	60 cm
Glass	4+16+4 mm insulated, tempered

Notes:

- This type of glass system is compatible with steel construction, not applicable to standard aluminum construction.

SLIDING SYSTEM S

GLASS SYSTEMS ► SLIDING GLASS SYSTEM S

Palmiye's new sliding glass system is perfect for any building and pergola, its adjustable wheels ensure smooth manoeuvring of each panel to both left and right. New Sliding Glass System S provides wider openings with 3, 4, 5, 6 rail options.

The tiny brushes between the 10mm glass prevents dust entering. Whether open or closed there is no loss of space with this system.

DOUBLE GLASS SLIDING SYSTEM

GLASS SYSTEMS ► SLIDING GLASS SYSTEMS

Buildings where insulation solutions have been prioritized, offers great comfort to its users.

This is an indispensable complement to energy saving efforts. The specially designed wheel system ensures smooth manoeuvring of each panel to both left and right and the tiny brushes between

the glass panels prevents dust and water entering.

With this solution you maximise the use of the natural heat that daylight provides.

LIFT AND SLIDE SYSTEM

GLASS SYSTEMS ► SLIDING GLASS SYSTEMS

When closed this system offers perfect water, wind, heat insulation and in addition to this the huge panels enable an unbroken panoramic view.

In order that the panels can be so big and the view unbroken, the system consists of a lifting mechanism that first lifts the panel

and then slides it. It is a very light weight system and slides very easily and smoothly without much effort.

SECTION SYSTEM

GLASS SYSTEMS ► FIXED & ADJUSTABLE SYSTEMS

Dividing spaces with this section system creates a lighter and brighter atmosphere.

With numerous options, this way of architecture is a creative and stylish way to split up your working area. As well as different colour options, glass films with any text or design can be laminated directly onto the glass.

Frameless applications divide without excluding and provide a light, stylish and enjoyable area to work in.

ADJUSTABLE PARAPET SYSTEM

GLASS SYSTEMS ► FIXED & ADJUSTABLE SYSTEMS

Operating vertically this parapet system can function interiorly as a room divider and exteriorly as a balcony and wind breaker.

Due to the adjustable height ability of the panels this product can provide finely tuned sound, heat and water control. This product can be used with or without motor, and due to special stabilizers; it can easily be set to the desired height without using much energy. Using the Motorized option can be operated by remote control.

PARAPET SYSTEM

GLASS SYSTEMS ► FIXED & ADJUSTABLE SYSTEMS

With its strong frameless panels the Parapet system provides uninterrupted views as well as a welcome wind shield too.

It is an ingenious form of glass fencing that can either be installed directly into the ground giving the appearance of the glass coming straight up from the earth or into a metal rail that runs along the bottom of the pane of glass.

SKY LIGHT SYSTEM

GLASS SYSTEMS ► FIXED & ADJUSTABLE SYSTEMS

The Sky Light system is a special glass roof that allows you to make full use of the natural light.

Using alternative double glazed glass, this system minimizes heat loss from the roof and the different coloured glass options create a beautiful effect.

The system will be priced according to the architectural project.

GLASS DOOR

GLASS SYSTEMS ► DOOR SYSTEMS

This beautifully designed panoramic glass door is an elegant feature in many buildings.

Flooding a room with natural light it creates a seamless flow between your various living arrangements.

This sturdy, frameless door has a special mechanism to stay fast in either the open or closed position. Different accessories are available to apply directly to the glass door.

PHOTOCELL DOOR

GLASS SYSTEMS ► DOOR SYSTEMS

This clean cut and stylish door system operates with a photocell sensor.

It has two or four configurations and a versatile design which allows for flexible application in many different settings. It also applies an intelligent OCS safety system, meaning that if an obstruction is in the way, it steps in to prevent clipping the person or object.

Security and access control are installed at the top of the frame. At the same time as applying excellent weather sealing qualities the frames are also reduced to the maximum so as to promote visibility.

ALUMINIUM DOOR

GLASS SYSTEMS ► DOOR SYSTEMS

This aluminium framed glass door provides a warm, stylish and functional door system.

Its robust, yet smooth operation results in a product you can rely on! The high performance seals protect the building from the elements of nature.

With a range of colours available from our powder coating or wood effect, this Aluminium Door System adds strength and substance to your existing building.

Figure 1 consists of two grid diagrams illustrating door dimensions. The left grid, titled "One Sided Panel Door Dimensions Table", shows a 6x5 grid of squares. The vertical axis is labeled "Height (cm)" with values 300, 275, 250, 225, 200, and 150. The horizontal axis is labeled "Width (cm)" with values 90, 97, 105, 112, and 120. The right grid, titled "Two Sided Panel Door Dimensions Table", shows a 6x5 grid of squares. The vertical axis is labeled "Height (cm)" with values 300, 275, 250, 225, 200, and 150. The horizontal axis is labeled "Width (cm)" with values 180, 194, 210, 224, and 240.
